Generating Workforce	%
With union labor	32%
Without union labor	68%
TOTAL	100%

Labor Information	Source: NEPOOL-GIS Public Reports. These values are for January 1 through December 31, 2016. Labor characteristics were calculated by dividing the number of certificates identified as union labor on the NEPOOL-GIS 2016 GIS Certificate Statistics – Other Attributes Report by the total number of certificates by fuel on the 2016 GIS Certificate Statistics – by Fuel Report. Subtracting that number from one results in the without union labor percentage.

Definitions	
Distribution Charges	Charges that are part of the basic service charges on every customer’s bill for delivering electricity from the EDC to your home or business
Generation Charge and Agreement	Charge for production of electricity at usage levels typical for residential and small commercial customers. Contract terms and conditions describe the length of your contract for generation service and other ancillary services included in your contract.
Transmission Charge	Charge for moving high voltage electricity from a generation facility to the distribution lines of an electric distribution company
Electric Distribution Company (“EDC”)	The public utility providing facilities for the distribution of electricity (the physical delivery of electric power) to retail customers

LABEL DESCRIPTION

Dynergy Energy Services (East), LLC d/b/a Dynergy Energy Services (“Dynergy”) agrees to sell, and you agree to buy, your full requirements for electric generation service at the prices and pursuant to the terms and conditions specified in this Disclosure statement and Terms of Service (“Agreement”). This Agreement governs your full requirements at the street address that you have specified and that Dynergy has agreed to serve. You will be bound by all the provisions of the Agreement, as they may be amended from time to time. The prices and terms of this Agreement are subject to change as provided below. Dynergy is licensed by the Massachusetts Department of Public Utilities (“DPU”) to offer and supply electric generation services in the Commonwealth of Massachusetts. Dynergy’s DPU license number is CS-166. We set the generation prices and charges that you pay. Your Electric Distribution Company (“EDC”) will continue to deliver the electric generation to you. Dynergy is not representing or acting on behalf of any EDC responsible for the service territory where you reside. The DPU regulates distribution prices and services.

Emissions are provided for the following pollutants expressed in percentages based on the twelve-month system average emissions through Third Quarter 2018.

Carbon Dioxide (CO2) is released when fossil fuels such as coal, oil or natural gas are burned. Carbon dioxide is a greenhouse gas and, thus, is a major contributor to global warming.

Nitrogen Oxide (NO2) is formed when fossil fuels and biomass are burned at high temperatures. They contribute to acid rain and ground-level ozone, aka smog, and may cause respiratory illness in children with frequent exposure.

Sulfur Dioxide (SO2) is formed when sulfur-containing fuels such as coal and oil are burned. Major health effects associated with SO2 include asthma, respiratory illness and aggravation of existing cardiovascular disease. SO2 combines with water and oxygen in the atmosphere to form acid rain.

Contact Information

Dynergy: Please use the following information to contact us with any questions about this Agreement or Dynergy charges on your invoice, to provide all notices under this Agreement, or to resolve any disputes regarding this Agreement.

Name: Dynergy Energy Services (East), LLC
 Address: 6555 Sierra Drive, Irving, TX 75039
